

RIDER "A"

PURCHASED POWER & OTHER ADJUSTMENTS

Applicability

The purchased power, tax and other adjustments set forth herein, apply to all of the Cooperative's rate schedules that are subject to Rider "A".

Determination of Purchased Power Cost Adjustment

The rates and charges set forth in Cooperative's schedules and subject to Rider "A" include a monthly overall power cost of \$0.089514 per kWh. The monthly overall power cost is computed by the cost of all power purchased under Buckeye Power's Rate Schedule "A" at all of the Cooperative's delivery points, including fuel cost adjustment, less all power costs associated with Schedule ELP-7A sales, divided by total energy sales, excluding energy sales for Schedules ELP-7A, under Buckeye Power's Rate Schedule A.

If Cooperative's overall power cost for any month is above or below \$0.089514 per kWh (determined to 6 decimal places or \$0.000000), the adjustment shall be applied to bills subject to Rider "A".

Adjustment for Direct or Allocable Impositions Levied on Consumers Bills

Effective May 1, 2001, the Ohio gross receipts tax has been repealed and replaced with the new Ohio excise tax (Kilowatt hour tax). This new Kilowatt-hour tax is on all customers electrical usage (kWh usage) each month and is in addition to the rates charged on the kWh usage by the Company's existing rate schedules.

The monthly (30 day period) rates for the new Kilowatt-hour tax are as follows:

<u>kWh used</u>	<u>Rate per kWh</u>
0-2000	\$0.00465
2001-15,000	\$0.00419
15,001 and above	\$0.00363

The Kilowatt-hour tax based on a daily average rate are as follows:

<u>kWh used</u>	<u>Rate per kWh</u>
0-67	\$0.00465
next 437	\$0.00419
501 and above	\$0.00363

Large electric power users (more than 45 million Kilowatt hours per year) may elect to self-assess the Kilowatt-hour tax at a reduced rate of \$0.00075 per Kilowatt hour plus 4% of the price of power.

In the event that any other additional direct or allocable taxes or other impositions are levied or assessed against Cooperative by any governmental authority, Consumer's bill as calculated using the rate schedules shall likewise be increased or decreased by the amount of such direct or allocable tax or other impositions. This adjustment may be added to and become a part of the Purchased Power Cost Adjustment set forth above, or be calculated as a separate item as determined by existing rules or laws.

Effective: June 1, 2023 Billing Period

Revised: March 23, 2023

Economic Development Adjustment

All rate schedules shall be subject to a charge of \$0.00086 per kWh. The revenue generated by this charge shall be used for the purpose of attracting new load to the cooperative service territory that benefits all members.

Application of Adjustments to Consumers Bills

Any adjustment based on kWh usage shall be identified as such on Consumer's bill and shall be applied to the total kWh billed and shall be in addition to any minimum charge that is applicable.

Any adjustment that cannot be determined on a kWh bases shall be set forth on Consumer's bill as a separate item.

All adjustments shall be determined utilizing the actual costs reflected in the Cooperative's bills. These adjustments will be calculated based upon the consumption during the month that the costs were incurred and will be included as part of the Consumer's bill in the following month.
